Rainfall (Liquid Equivalent) Forecast

- ✓ Precipitation changing to all rain outside of the higher elevations by Tuesday afternoon
- ✓ Rainfall amounts (including liquid equivalent of frozen precip) between 0.75-1.25" in most areas, heaviest toward the coast
- ✓ No flooding concerns anticipated at this time

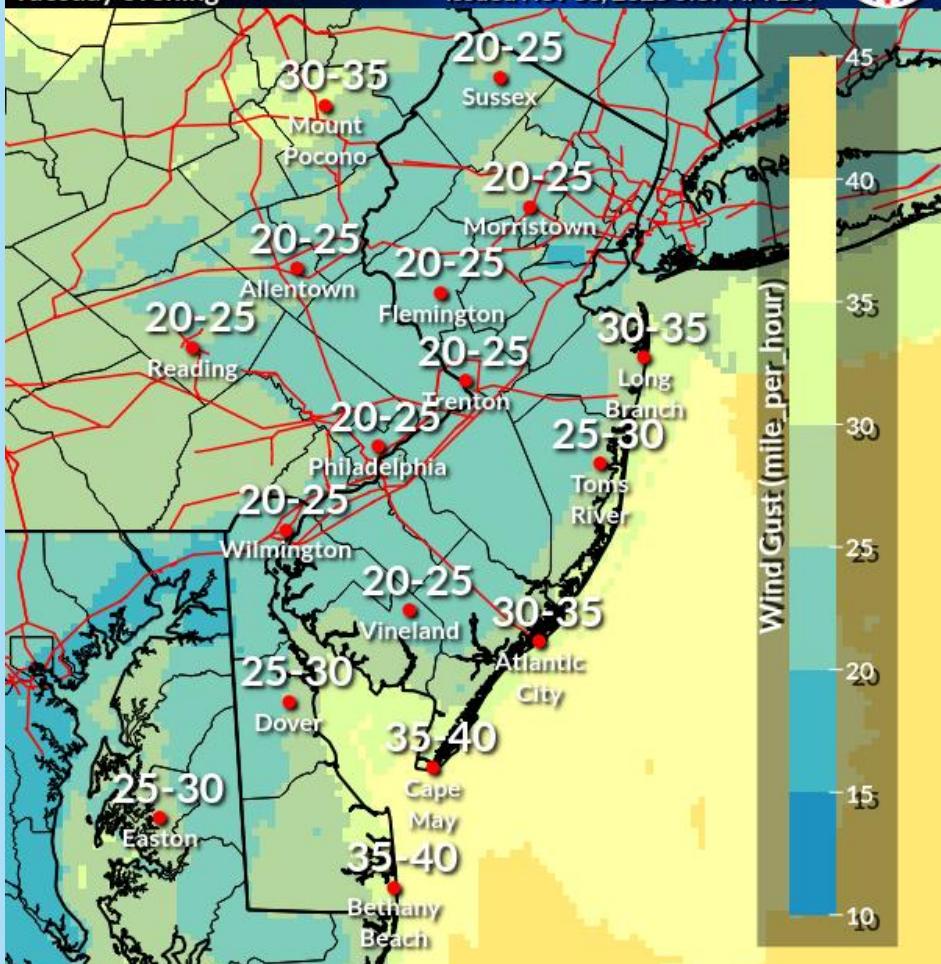

Hazardous Marine Conditions

Max Wind Gusts

Tuesday evening

Weather Forecast Office
Mount Holly, NJ

Issued Nov 30, 2025 5:37 AM EST

[NWS Mount Holly](#)[weather.gov/phi](#)

- ✓ Gusty northwest winds developing Tuesday evening
- ✓ Some gale force wind gusts possible across all coastal waters
- ✓ Seas building 5-8 feet

Event Summary

- ✓ A storm system will bring widespread precipitation to the region on Tuesday. Precip beginning as snow northwest of I-95, with a transition to all rain from south to north from Tuesday morning and into the early afternoon.
- ✓ Confidence in snowfall amounts remains low at this time. There is potential for 1-4" of snowfall northwest of I-95 and into the I-78 corridor. Farther north, there is potential for snowfall amounts near 4-8", especially at elevations above 1,500 feet in the southern Poconos and NW NJ. Snowfall amounts along the immediate I-95 and NJTP corridors is forecast to remain mostly less than 1", if any snowfall does occur.
- ✓ Rainfall, including liquid equivalent of frozen precip, is forecast to range from around 0.75" to 1.25" across the area. No flooding concerns are anticipated at this time.
- ✓ Gale force wind gusts possible Tuesday night. Winds increasing to 20-30 kts across all coastal waters of NJ and DE, and DE bay. Seas building 5-8 feet.
